Terms & conditions

One thing is certain – things move on, constantly. The demands placed on vehicles and plant increase all the time, demanding better oil and lubricant. The pressure to stay ahead never stops growing. Better performance, greater efficiency, reduced costs – no one understands these pressures better than Millers Oils.

Engine Oil, Gearbox Oil, Hydraulic Oil and Industrial Oil for all applications

For more than a century, Millers Oils have developed and supplied advanced engine oil, gearbox oil, lubricant and fuel additive for a wide spectrum of automotive, commercial vehicle and industrial applications, working hard to keep our customers in the lead.

To make this happen, innovation has always been the engine of our operation. We invest heavily in product development and research to produce some of the most advanced oil formulations in the world. But to our customers we're not simply a supplier; we're a company of ideas. We think ahead. We help them to adapt as their needs change. We offer creative solutions to their practical lubrication problems. Our car oil offers the highest levels of protection to modern and classic engines. We were the first to introduce engine oil specifically for diesel engines and gave users the opportunity to increase oil drain intervals.

The automotive and car oil portfolio offers

- car oil (engine oil and gearbox oil, from mineral oil to fully synthetic)
- motorcycle oil (2 stroke oil and 4 stroke oil and again based on all types of oil from mineral oil to fully synthetic oil)
- oil for motorsport (a comprehensive range of engine and gearbox oils and fuel treatment to give that vital extra bit of performance)
- fuel additive (for improved power and fuel economy)
- classic oil (engine oil and gear oil for the older car or motorbike requiring classic oil formulations)

The commercial vehicle oil portfolio offers

- engine oil and gearbox oil
- hydraulic oil and fluid
- fuel additive (to improve fuel economy and reduce fleet running costs)

The large industrial oil portfolio offers

- lubricants and grease
- metalworking oils
- cutting and honing oils
- hydraulic oils and fluids

It takes energy, commitment and a flexible approach throughout. Compared to others in the oil industry, we're uniquely set up to respond to new developments. We're quicker to adopt new technologies and advances, and to recognise how these can be developed for our customers' benefit. In short, we like to keep things fluid.

The end result is a range of high-quality, leading edge products that you can rely on for greater protection and performance under the most extreme conditions, whatever the application.

Now there's a thought.
